VISN8 Research Collaboration Accelerator

The U.S. is divided into 18 Veterans Integrated Service Networks, or VISNs — regional systems of care working together to better meet local health care needs and provides greater access to care.

This document is intended to promote research collaboration within and between each VA station in VISN8 (Sunshine Healthcare Network). For example:

- New investigators seeking mentorship in their area of interest, including for Career Development Awards.
- Clinician-investigators seeking collaboration or mentorship.
- Identifying compatible sites for multi-site research proposals and projects.

The tables and word clouds in this document were generated by artificial intelligence, and may not fully represent the scope of research being conducted in each region. An additional strategy is to search (Ctrl + F) the document for keywords, which may appear in the full text study titles.

For a national listing of study titles visit the [National VA Research Dashboard](#).

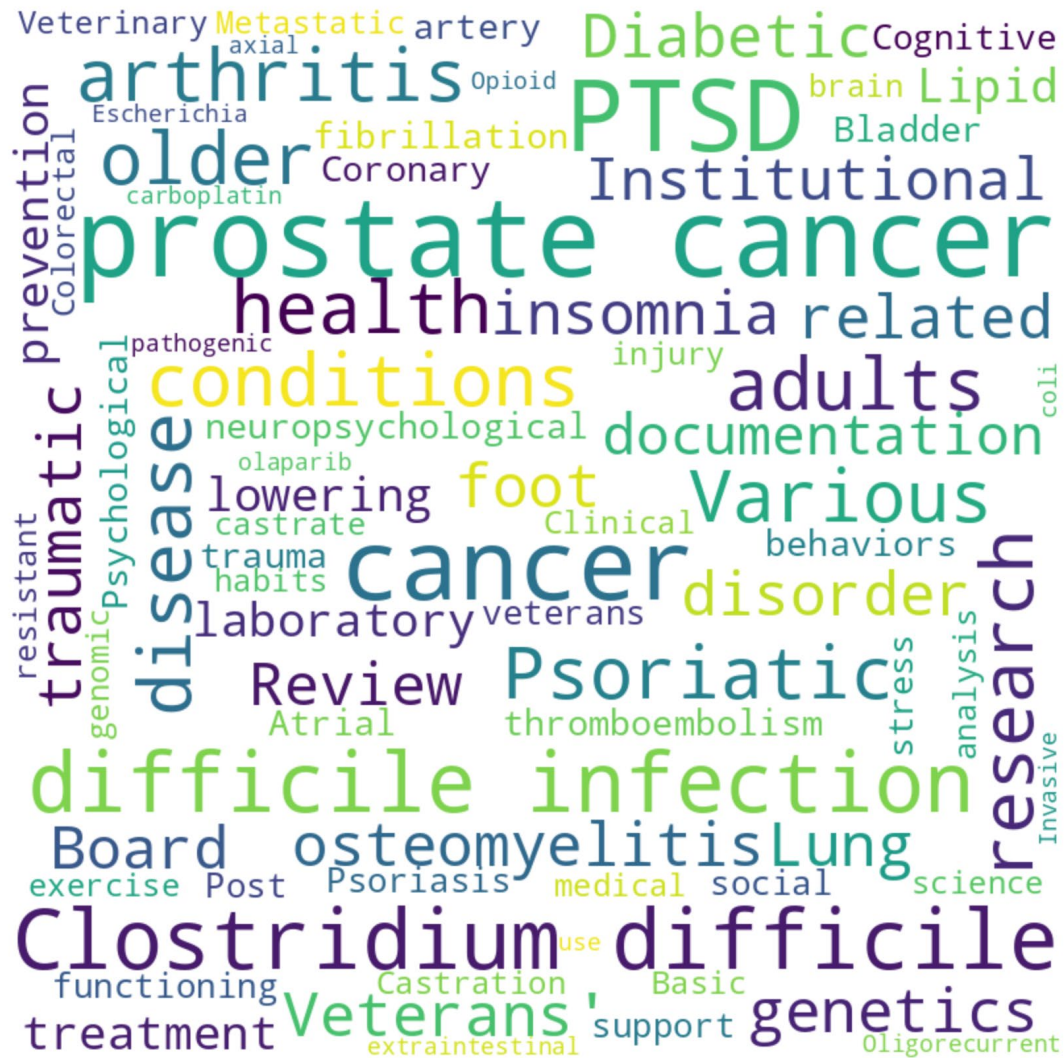

For feedback on this document please contact David Clark, ACOS/Research for the North Florida/South Georgia Veterans Health System. David.Clark1@va.gov
